Professional Summary

Computer Science Engineer with hands-on experience in AWS, Python, Linux, Docker, FastAPI, and CI/CD, building cloud-native, distributed, and AI-powered applications focused on automation, scalable infrastructure, and reliable backend systems. Skilled in cloud solutions and DevOps practices focused on system reliability.

Education

Lovely Professional University

Bachelor of Technology in Computer Science & Engineering

Aug 2022 – Jun 2026

Phagwara, Punjab

Technical Skills

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, VPC, CloudWatch, Auto Scaling, ELB, ECS), Docker, GitHub Actions, CI/CD, Terraform (Basics), Linux, Networking Fundamentals

Languages: Python, SQL, Java

Backend: FastAPI, REST APIs, PostgreSQL

AI & Automation: OpenAI API, Retrieval-Augmented Generation (RAG), AI Workflow Automation (n8n)

Tools: Git, GitHub, Postman, Figma

Experience

GokBoru Tech. [\[GitHub\]](#)

Jun 2024 – Aug 2024

Cloud Computing with AWS

Remote

AWS (EC2, S3, RDS, IAM, VPC, Auto Scaling, CloudWatch, Elastic Load Balancer), Docker, Linux

- Completed a 7-week AWS Cloud Computing training focused on cloud deployment and infrastructure management.
- Designed and deployed an AWS-based e-commerce infrastructure using EC2, Auto Scaling Groups, and Elastic Load Balancer to support scalable and highly available applications.
- Monitored AWS resources using CloudWatch and applied Linux administration and cloud security best practices.

Projects

SmartCampus – AI Attendance Recognition System [\[GitHub\]](#)

Feb 2026 – Mar 2026

Python, FastAPI, OpenCV, JWT Authentication, WebSockets

- Contributed to the development of an AI-powered attendance system using facial recognition and real-time webcam scanning.
- Developed REST APIs and implemented authentication and role-based access control for student, faculty, and admin workflows.
- Developed dashboards, reporting modules, and real-time attendance features for student, faculty, and administrative workflows.

CloudShareX – Distributed File Sharing Platform [\[GitHub\]](#)

Nov 2025 – Dec 2025

Python, FastAPI, AWS (EC2, S3, IAM, VPC, CloudFront), Docker, GitHub Actions

- Designed and developed a secure file-sharing platform supporting authenticated file uploads and sharing.
- Integrated AWS S3 and CloudFront to improve file delivery performance and accessibility.
- Implemented Docker-based deployment and CI/CD pipelines while configuring IAM policies and secure access controls for cloud operations.

IncidentPilot AI – AI-Powered DevOps Incident Assistant [\[GitHub\]](#)

Aug 2025 – Sep 2025

Python, FastAPI, AWS (EC2, CloudWatch, IAM), Docker, GitHub Actions, Terraform, PostgreSQL, API, RAG

- Developed an AI-powered incident management platform that analyzes infrastructure alerts, performs LLM-based log analysis, and generates root cause insights and remediation recommendations.
- Integrated AWS CloudWatch and SNS to automate incident detection, troubleshooting workflows, and incident report generation.
- Built FastAPI services and PostgreSQL-based incident tracking APIs while implementing Docker, GitHub Actions, and Terraform for automated deployment and Infrastructure as Code (IaC).
